SL1500 Stepper Driven Label Applicator

St. Petersburg, FL. - Universal Labeling Systems announced the release of the SL1500 Modular Label Applicator.

- High performance stepper motor
- Label dispense speed up to 1500 inches per minute
- 6.375" web capacity (standard)
- 8.125" web capacity (optional)
- Photoelectric label sensing (standard)
- Clear label sensing (optional)
- Wipe on module (standard)
- 12" long peeler arm assembly
- Adjustable peeler bar assembly
- Tamp module (optional)
- Tamp Blow module (optional)
- Blow On module (optional)

The most universal of Universal Labeling Systems label applicators has truly perfected the modular approach to label applicators. In order to serve the needs of our customers, this modular style gives Universal the ability to provide a variety of applicator configurations "just in time."

The new SL1500 features:

- *Label teach*, a quick and easy adjustment to the leading and trailing edge of varying label sizes.
- *Speed matching* that allows the exact control of speed and settings via a simple digital dial control.
- *Save Menu* providing the ability to save up to 99 different jobs.
- *Multi-level menu system* separating the operator interface from the set-up program, offering added production security.
